Solution Area: Business Optimization

Project Location: Primarily Philadelphia – travel 10-20%

naviGATE is seeking a manager to join our growing, boutique, management consulting firm in Villanova, PA. naviGATE works collaboratively with our clients to help them improve operational effectiveness and achieve their strategic goals. As a growing, regionally focused, management consulting firm we bring the experience, expertise and resources needed to help our client succeed.

Position Description

naviGATE is seeking a management consultant with 4-8 years' experience, preferably with national management consulting firm, to participating in a growing a regionally focused management consulting firm. This position requires using business and technology management consulting skills to provide business analyst, financial analysis and strategic planning functions. The position will be responsible for working with experienced managers in a project-based environment to help the firm's client make their business strategies a reality to improve their business operations.

Position Responsibilities

Develop strategies for organizations seeking to modernize their business processes and recommend practical solutions that help reduce costs and improve business operations.

Requirements include:

- Minimum four years' experience and track record participating in the delivery of complex projects and the creation of highly professional client deliverables.
- Experience in designing and improving business processes across a variety of business process areas.
- Six-Sigma or Lean Process trained a plus
- Ability to lead/project manage a client workstream
- Strong analytical and communication skills
- Ability to facilitate teams through solution design and present findings to senior execs
- Able to establish personal connections with clients empathize with their needs and offer creative, practical guidance while working in a team environment.
- Ability to achieve results and follow tasks through completion
- Complying with standards of professional conduct
- Imagination and creativity, seasoned professional judgment and maturity
- Analyze the current state, identify issues, weaknesses and opportunities for improvement, and support the development of creative strategies to help our clients achieve business success. Engagements will focus on use of technology to achieve business process efficiency, go-to-market for new products and achievement of world-class service quality levels.
- Able to propose short-term and long-term implementation strategies addressing a variety of client operational needs.

Education Requirements

- Bachelor's Degree in Industrial engineering, Finance, or Management Information systems
- Masters' Degree a plus
